Country	Seasonal temperature JJA 2017		Seasonal precipitation JJA 2017		High Impact Events
	Observed	MedCOF climate outlook for temperature	Observed	MedCOF climate outlook for precipitation	
Bulgaria	Above normal	Near or above normal	Near normal in average for the country	No forecast or near normal	<p>Around 30 June - 1 July the maximum temperatures soared to extreme levels driven by approaching cold front from northwest. They went above 40°C at some places for example - Ruse, 43.6°C.</p> <p>Fire weather conditions in the southeast were indicating very high risk for wild fires in late August due to long lasting hot and dry weather (Fig. 5).</p>
