

## CLIMATE OUTLOOK FOR THE 2019/20 WINTER SEASON IN SERBIA

October 25<sup>th</sup>, 2019

The entire country is likely to experience above-average winter air temperature relative to the **1981-2010 base period**. Winter precipitation sums in Serbia are likely to be below- to near-normal.

Consequently, Serbia will experience a milder and somewhat drier winter compared to the average conditions.

Probability for winter temperature 2 m (%)	Probability for winter precipitation (%)
<b>Above-normal</b> (20, 30, 50)	<b>Below- to near normal</b> (40, 40, 20)
In the entire country	In the entire country

The numbers in brackets (left to right) refer to the values of meteorological parameters for: below-,near- and above- normal conditions.
