

SUMMER 2012, CYPRUS

The summer of 2012 (June, July, August) was relatively warm and wet. Specifically, in June the mean air temperature was about 1.9 °C above normal, in July about 2.0 °C above normal and in August 1.7 °C above normal.

The area average precipitation was above normal for the whole summer period i.e. 138% of normal. Specifically, in June the area average precipitation was 9.0 mm i.e. 150% of normal, in July 4.0 mm i.e. 154% of normal and in August 2.9 mm i.e. 100% of normal.

Summarizing all the above, please see the tables below:

Month	Actual Precipitation (2012) (mm)	Normal Precipitation (1961-1990) (mm)	Actual/ Normal Precipitation (%)
June	9.0	6.0	150
July	4.0	2.6	154
August	2.9	2.9	100
Total	15.9	11.5	138

Month	Maximum (°C)	Minimum (°C)	Mean (°C)
June	+ 1.9	+ 1.9	+ 1.9
July	+ 1.7	+ 2.3	+ 2.0
August	+ 1.5	+ 2.0	+ 1.7
MEAN	+ 1.7	+ 2.0	+ 1.9
