27 May 2013, Sofia

The latest forecast issued in April was for summer season with mean seasonal temperature near or above normal and seasonal rainfall near normal. The two tables below illustrate the latest forecast from May. It still favors a summer season with mean seasonal temperature near or above normal and seasonal rainfall near normal. Summer 2013 in Bulgaria should be less warm and with more precipitation than summer 2012.

Temperature	10-days	Month	Summer
June	01-10		
	11-20		
	21-30		
July			
August			

Precipitation	10-days	Month	Summer
June	01-10		
	11-20		
	21-30		
July			
August			

	warm		wet
	warm to normal		wet to normal
	normal		normal
	cold to normal		dry to normal
	cold		dry
	not available		not available
	all categories are likely		all categories are likely
